Migration Type	Data	Notes
Farm Structure	Up to 10 years of data	5 years is the default Gatekeeper sets unless edited by the user
	Business Name	
	Holdings	Gatekeeper Holding Yield Region defines the holding region
	Field Groups	No longer part of the structure but converted to Tags
	Fields	
	Cropping Records	Gatekeeper splits and seqences carried across
	Cropping Record Working Areas	Become Cropping Record Areas. These summed together make the Workable Area of a Field. Depending on the number of years you migrate we look across all these years and the largest Workable Area in any given year becomes the Full Area
	Crops	Gatekeeper Crops are linked back to the crop groups that the crop belongs to (see below for user defined crop names)
	Varieties	Gatekeeper Varieties where no match is found then Unspecified is put as the variety in TCM and a Cropping Record Note is added with the legacy GK variety
	User Defined Crop Names	Gatekeeper User defined crop names can be optional turned in to Crop Rotation Tags, End Use Tags or Grass Type Tags
	Map Sheet & NG Number	Combined in to MapSheet / NG Number
	NVZ region	Converted in to Nitrate Status
	Soil Sampling Jobs	Any soil sampling results on each field within the seasons that you have selected to import
Completed Operations Data Only	Completed Jobs	Jobs are inserted in to the relevant seasons
	Fixed Cost Products	Contextal matched on name and converted in to appropriate Activities
	Output Products - Primary Outputs	Products created in Produce heading
	Output Products - Secondary Outputs	Products created in Produce heading when Secondary Produce is introduced this will be changed to that
	Output Products - Funding Schemes	Converted in to Misc Receipts as transactions
	Variable Cost Products - Adjuvants	Adjuvants are automatically matched by name. Where not then the user will need to match manually in migration process
	Variable Cost Products - Dessicants	Regulated Chemicals are automatically matched on MAPP number. Unlinked chems will need to be matched manually in migration process
	Variable Cost Products - Fungicides	Regulated Chemicals are automatically matched on MAPP number. Unlinked chems will need to be matched manually in migration process
	Variable Cost Products - Growth Regulators	Regulated Chemicals are automatically matched on MAPP number. Unlinked chems will need to be matched manually in migration process
	Variable Cost Products - Herbicides	Regulated Chemicals are automatically matched on MAPP number. Unlinked chems will need to be matched manually in migration process

	Variable Cost Products - Insecticides	Regulated Chemicals are automatically matched on MAPP number. Unlinked chems will need to be matched manually in migration process
	Variable Cost Products - Molluscicides	Regulated Chemicals are automatically matched on MAPP number. Unlinked chems will need to be matched manually in migration process
	Variable Cost Products - Other Pesticides	Presented to the user to match manually in migration process
	Variable Cost Products - Seed Dressings	Automatically allocated to Other Products heading
	Variable Cost Products - Store Chemicals	Automatically allocated to Other Products heading
	Variable Cost Products - Unregulated Pestic	Automatically allocated to Other Products heading
	Variable Cost Products - Fertilisers	Automatically matched to curated list by name and analysis. Where not then the user will need to match manually in migration process and provide analysis when missing
	Variable Cost Products - Trace Elements	Automatically matched to curated list by name and analysis. Where not then the user will need to match manually in migration process no mandatory requirement to provide analysis when missing
	Variable Cost Products - Lime	Automatically copied in to Lime heading
	Variable Cost Products - Organic Manures	Automatically imported when manure type and analysis is found. If no analysis then provide the default for that manure type. If no manure type then the user will need to provide this in the migration process
	Variable Cost Products - Seed /Plant	Contextal matched on name where possible if not then user will need to match manually in migration process
	Variable Cost Products - Labour Costs	Automatically copied in to Other heading
	Variable Cost Products - Other Variable Cos	Automatically copied in to Other heading
	Implements	If found within a completed job then copied to implements
	Tractor Units	If found within a completed job then copied to machines
	Advisor	If found within a completed job then copied to personnel
	Operator	If found within a completed job then copied to personnel
